

# MalosaWeb

I am happy to discuss a proposed website for any individual, club or society as well as small business sites. Businesses will be charged by the day rather than a flat setup rate for individuals and clubs or societies.

## **Design Ideas.**

I will look to the client to provide me with ideas about the style of site required and the content for the pages (including graphics where they are site-specific, e.g. a club logo or illustrations from books\*). Ideally I would like material supplied on disk or as attachments to emails as this will speed the creation of the site.

## **Pricing Structure**

### **Creating a site from scratch.**

GBP £50 development/creation of site style (all clients).

GBP £50 per day spent on creating the initial pages of the website (businesses only).

I estimate that making the pages will be at the rate of 1 day per 2 x A4 (this does not imply that the content of one full page of A4 = one web page).

### **Site maintenance.**

GBP £30 per day per update (businesses only).

GBP £40 per quarter (3 months). This assumes just routine updates or a maximum of 7 days per quarter. If more than 7 days per quarter, a charge of GBP £25 will be levied in addition to the quarterly rate (businesses only).

### **Redesigning an existing site.**

This will depend on how complex it is and how many pages the site has and thus I cannot provide a price here.

### **Web Space**

I can arrange web space at a typical cost of as little as GBP £0.99 per month from the UK-based company Supanet at [www.supanethosting.com/web-hosting/hosting-packages/](http://www.supanethosting.com/web-hosting/hosting-packages/). This will include domain name registration for two years.
